

HI FOR LIVING - Raises automatically in 12 seconds for spacious, comfortable living.

HI-L

**The world's most fuel efficient travel trailer
also gives you maximum comfort and livability.**

LO FOR TRAVEL - Lowers easily with the flip of a switch for safety, easy towing and up to 64% savings on gas.

1983

Designed Smart.

Hi-Lo designs its telescoping travel trailers to fit the needs of the traveler. For over 25 years, our aerodynamically efficient low travel profile has provided the maximum in fuel efficiency, safety and towability while our well-planned interiors have provided all the roominess, beauty and comforts of home.

Up to 64% in gas savings.

Hi-Lo's streamlined models have the proven "aerodynamic advantage." Our renowned low travel design profile reduces air drag up to 70% and can mean 64% savings on your gasoline bills, compared to regular upright trailers.

In a recent fuel economy test conducted by Transportation Research Center of Ohio, Hi-Lo again proved to be "the world's most fuel efficient travel trailer." Using an Olds Cutlass Supreme with a 262 cubic inch engine and special fuel consumption measuring instruments, a Hi-Lo was towed on TRC's high speed test track. The car achieved 64% better gas mileage towing a 21 foot Hi-Lo than towing a popular upright 21 foot travel trailer of a similar weight and a remarkable 35% better gas mileage than a 15 foot upright travel trailer weighing 1215 pounds less. Reduced air drag obtained through decreased frontal area and aerodynamic design prove to be the most important factor in reducing fuel consumption.

Safe and easy to tow.

Engineering ingenuity gives a Hi-Lo greater stability at all speeds by reducing sway and buffeting caused by large vehicles and cross winds and you have better braking control. Your wife will have complete confidence when it's time for her to take the wheel.

Comfort and Livability.

All Hi-Lo's are designed for complete comfort, luxury and convenience in family living. Particular emphasis is placed on enlarged interior storage space to enhance even further the livability of your Hi-Lo.

Just flip a switch and your Hi-Lo raises automatically in 12 seconds to give you every possible comfort and livability feature.

Tasteful, plush, easy-to-care-for fabrics, scuff resistant cushioned vinyl floors and maintenance-free laminate countertops keep chores out of your fun times. Sleek, modern kitchens offer step-saving designs and finest equipment. Luxurious living is enhanced by our fresh color schemes and decorator-coordinated upholstery, drapes, carpets and tables. Our

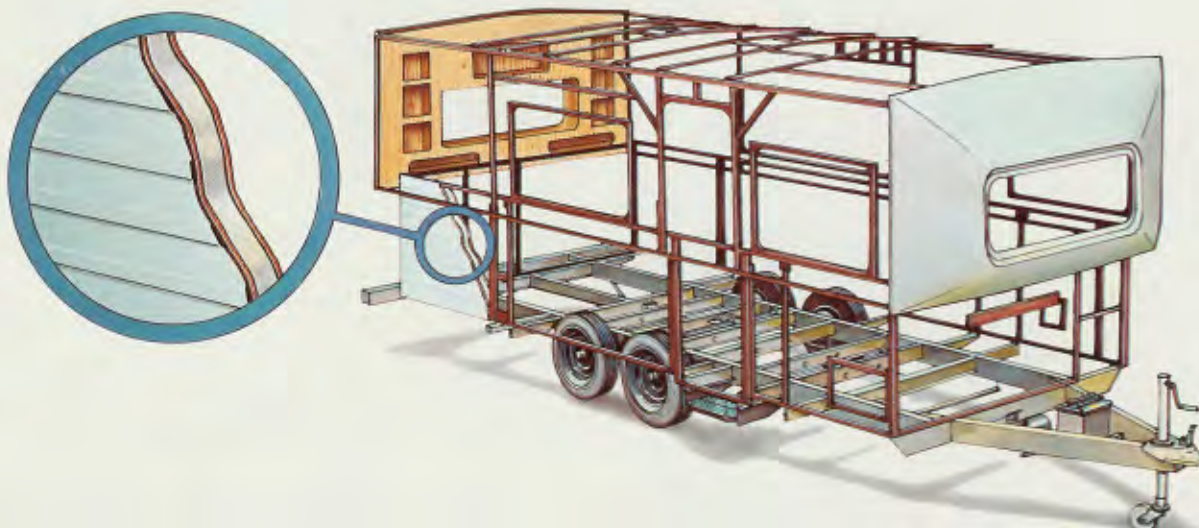

full-length beds offer the ultimate in sleeping comfort and our versatile soft-backed sofas are easily converted into luxurious beds. Deluxe, roomy bathrooms have sparkling easy-care fixtures and fittings.

Ask your dealer about the exciting Hi-Lo options that let you customize your home away from home.

With its lightweight construction, low center of gravity and aerodynamic efficiency, the Hi-Lo is safe and easy to tow. Prove it to yourself - test tow a Hi-Lo at your dealer today.

Engineered Tough.

Hi-Lo is one of the lightest weight yet strongest travel trailers you can own. Hi-Lo's tubular steel frame construction is lighter and stronger than the usual wood construction, and is deliberately over-engineered to give outstanding durability, security and long-term value. A great buy for those who pride themselves on spending wisely.

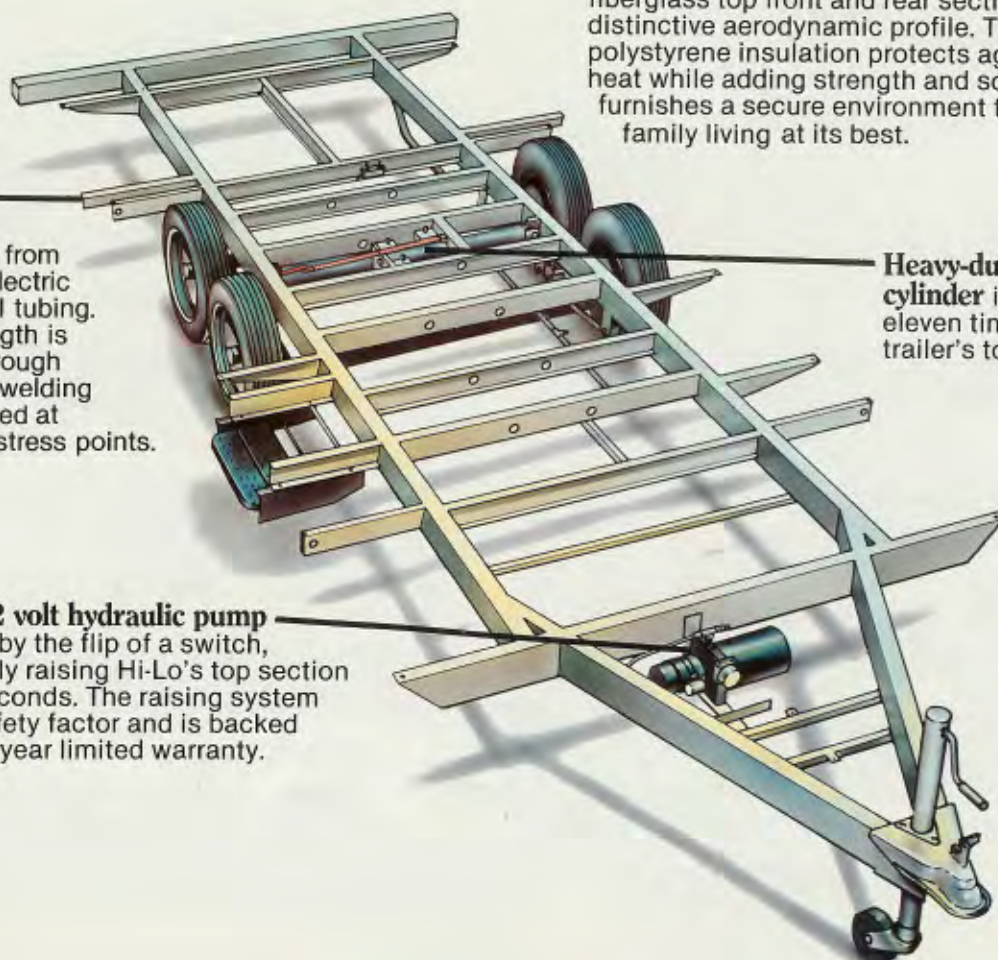

Tough frame construction consists of a tubular steel rib cage top and bottom. All parts are jig assembled for precision and carefully welded for strength.

Strong, lightweight ceiling and side wall construction is a laminated sandwich of aluminum exterior skin, plywood, polystyrene foam, tubular steel and plywood interior paneling. Tough molded fiberglass top front and rear sections give Hi-Lo its distinctive aerodynamic profile. The top quality polystyrene insulation protects against both cold and heat while adding strength and soundproofing. It furnishes a secure environment to enjoy family living at its best.

Rugged chassis is constructed from hot rolled, electric welded steel tubing. Added strength is achieved through accurate jig welding and reinforced at engineered stress points.

Heavy-duty hydraulic cylinder is capable of lifting eleven times the weight of the trailer's top section.

Powerful 12 volt hydraulic pump is activated by the flip of a switch, automatically raising Hi-Lo's top section in just 12 seconds. The raising system has a 4-1 safety factor and is backed by Hi-Lo's 6 year limited warranty.

16S

HI for living

Raises automatically in 12 seconds for spacious, comfortable living.

LO for travel

Lowers easily with the flip of a switch for safety, easy towing and up to 64% savings on gas.

Fully automatic lifting system

Hi-Lo's "Hi for living, Lo for travel" feature is made possible by our patented lifting system that is standard equipment on all models.

In just 12 seconds, with the flip of a switch, the top raises or lowers a full 31 inches. The hydraulic system is unique and fully automatic, proved in over 15 years of use. For added safety, a child-resistant bar locking system positively secures the lifting mechanism when your Hi-Lo is in the "Hi" position. Dependable and maintenance free. Ask your dealer for a demonstration.

Easy storage in your garage

Just lower the top and back your Hi-Lo right in. Saves renting storage space and it's always right there for your immediate pleasure, safe and secure. Allows you to comply with local zoning ordinances.

Ideal for today's smaller cars

Hi-Lo's "FunChaser" trailer can be hitched to your Malibu, Cutlass, Monte Carlo or other mid-sized cars. Hi-Lo's FunLite trailers can be hitched to almost all cars, including the small GM "X-cars"; Ford Granada and Fairmont; Chrysler LeBaron and most small trucks; Chevy S-10 and Toyota. Hi-Lo actually weighs less than most other travel trailers. Compare our weights and see for yourself the many advantages Hi-Lo has over the typical "stick and staple" upright trailers.

Fuel efficiency, aerodynamics, lightweight, towability, safety and comfort all add up to more fun-filled adventure for you and your family.

Value now and when you trade

Because Hi-Lo builds in quality during every step of the production process and offers so many exclusive features for extra economy, safety, durability and convenience, we confidently call it "the travel trailer that has it all."

And Hi-Lo gives you higher resale value than other trailers in its price category; well worth the initial investment because it retains its value.

Six-Year Limited Warranty on lifting system

Hi-Lo warrants that it will replace any part of your Hi-Lo hydraulic lifting system (excluding the battery) which becomes broken or inoperative due to defects in material or workmanship within six years from date of original purchase.

That's how confident we are of its dependability. Six-year limited warranty applies to the lift on all models.

In addition, Hi-Lo warrants that it will repair or replace any part of your Hi-Lo travel trailer found to be defective due to defects in material or workmanship within 12 months from date of original purchase. (Components such as tires, battery, plumbing and electrical fixtures, refrigerator, range, etc. are subject to separate warranties issued by other manufacturers.)

Ask your dealer for complete details of both warranties.

Hi-Lo makes product improvements on a continuing basis. Due to this policy, and to changes in specifications, design, production and availability of supplies, the accuracy of all written and pictorial information cannot be guaranteed. Therefore, the availability of certain models, floor plans, colors, materials, and equipment shown in this brochure is subject to change without notice. Please contact your Hi-Lo dealer for current models, specifications and information.
