Lifetime Limited Warranty on Lifting System

Hi-Lo warrants to the original purchaser that it will repair or replace (through its authorized service centers) any part of your Hi-Lo hydraulic lifting system (excluding the battery) which becomes broken or inoperative due to defects in material or workmanship. In addition, Hi-Lo warrants that it will repair or replace (through its authorized service centers) any part of your Hi-Lo travel trailer found defective due to defects in material or workmanship within 12 months from date of original purchase. (Components such as tires, running gear, power converter, battery, plumbing & electrical fixtures, refrigerator, range, etc. are subject to separate warranties issued by other manufacturers.)

Coupler Height	26½"	26"	26½"	26½"

Note: All weights above are estimates, and may vary from trailer to trailer.

Steps for Determining Correct Load Limit—

1. Locate the statement "The weight of cargo should never exceed XXX kg or XXX lbs." On your vehicle's placard.
2. This figure equals the available amount of cargo and luggage load capacity.
3. Determine the combined weight of luggage and cargo being loaded on the vehicle. That weight may not safely exceed the available cargo and luggage load capacity.

2.3 Weight Distribution (continued)

Weight of optional equipment

Swing away bed	80 lbs.	Air Conditioner	105 lbs.
14 ft. Awning	93 lbs.	Spare Tire & Wheel	54 lbs.
18 ft. Awning	107 lbs.	Extra O.H. Cabinets	40 lbs.

2.4 Packing and Inspecting Trailer

Part of the fun of trailer travel and camping is the ability to take along recreational equipment such as a boat, motor, fishing gear and sports equipment. Comfort items such as awnings, folding tables, and chairs add to your camping pleasure. And, you will certainly want to include some of the foodstuffs from your own kitchen. Also, be sure to fill your water tank.

Although your Hi-Lo trailer is sturdily built with margins of safety, too much extra weight can damage the undercarriage and cause excessive tire wear. Check label GW on the left front corner for maximum Gross Vehicle Weight.

Your Hi-Lo trailer is designed and balanced for easier and safer towing so that just the right tongue weight rests on the car hitch. In packing extra equipment, it is important to maintain that balance as near as possible fore and aft. It is also recommended that the heaviest item to be positioned as near as possible to directly over the wheels. In stowing loose equipment, pack it in such a way as to avoid shifting during acceleration or braking. Pad heavy and sharp items to avoid damaging interiors and equipment. A little extra care and a few minutes spent in getting your trailer ready for travel assures a pleasant trip.

2.5 Vehicle Inspection

Your vehicle should be in good running order. Also tires, lights, and brakes should be checked before travel.

2.6 Be sure waste holding tanks are empty. (See 8.9)

The above weights are approximate weights of standard models. Add for optional items if applicable:

GVWR (Gross Vehicle Weight Rating) means the maximum permissible weight of this trailer. The GVWR is equal to or greater than the sum of the Unloaded Vehicle Weight plus the Net Carrying Capacity.

UVW (Dry or Unloaded Vehicle Weight) means the weight of this trailer as built at the factory. If applicable, it includes full generator fuel, engine oil, and coolants. The UVW does not include cargo, fresh water, LP gas, or dealer installed accessories.

CCC (Cargo Carrying Capacity) means the maximum weight of all personal belongings, food, fresh water, LP gas, tools, dealer installed accessories, etc, that can be carried by this trailer. (NCC is equal to or less than GVWR minus UVW).

This trailer is capable of carrying up to 36 gallons of fresh water (including water heater) for a total of 300 pounds. Reference: Weight of fresh water is 8.33 lbs/gal; Weight of propane is 4.5 lbs/gal (average).
