Optional trip on the Pikes Peak Cog Rail ([click here to exit to their website](#))

We will arrange car pool transportation to the Depot in Manitou Springs. The round trip lasts approximately 3 hours and 10 minutes. The track to the top is 8.9 miles long. Along the route, the conductor will entertain you with the history and facts of the mountain, the region and the engineering feat that is the Manitou and Pikes Peak Railway. You'll enjoy fantastic rock formations, spectacular vistas and breathtaking cliffs all from the comfort and the safety of the cog train. Once at the top of Pikes Peak, you have about 30-40 minutes to walk around, shop in the gift shop, use the restrooms and/or get a snack at the Cafe. The summit will be cooler than at the Depot so you will need to dress warmly in jackets or sweaters.

CAUTION: You will be traveling up to an elevation of 14,115 feet (4302 meters). Some people may experience altitude sickness which may include symptoms of dizziness, nausea and headaches. In addition, if you are pregnant or have cardiac or respiratory problems, it is advised that you not make the ascent without first consulting your physician.

High Altitude Tips:

Colorado Springs is at an altitude of 6,035 feet. The KOA campground is 5,564 feet. Manitou Springs, just five miles to the west of Colorado Springs, is 6,320 feet. Further west, the towns of Victor and Cripple Creek are over 9,500 feet. The summit of Pikes Peak towers above them all at 14,115 feet.

To enjoy your visit here in the Colorado Springs area, here are a few high altitude tips to keep in mind to give your body time to adjust to the altitude and prevent altitude sickness:

- Stay below 7,000 feet the first day (the KOA campground is 5564 feet above sea level.)
- Give your body time to adjust (there's lots to see and do at lower altitudes.)
- Avoid strenuous exercise the first day.
- Limit alcohol intake. Alcohol binds oxygen and water and robs your body of these two important nutrients.
- Drink more water. The air is drier and your body will dehydrate much more quickly. The higher up you go, the more water you should drink.
- Always travel with a companion. If someone begins to experience severe coughing, wheezing, shortness of breath or chest pain, get him or her to a lower altitude as quickly as possible.
- The effects of some drugs such as tranquilizers can be greatly increased at higher altitudes. Be sure to check with your doctor first before exerting yourself at higher altitudes

We certainly do not want to scare you from coming to Colorado. The vast majority of visitors never even have a problem with high altitude. We just want to inform you of our area so you have an enjoyable time while you are here. We have over 300 sunny days per year for your enjoyment so bring your sunscreen.

The Rocky Mountain Hi-Lo Club looks forward to hosting the 2014 rally.
