

Congratulations! Your new recreational vehicle features an exceptionally durable fiberglass reinforced Filon exclusive Filoplated® Gel Coat frp sidewall and/or Filon embossed seamless Sunguard® flexroof. With proper care and maintenance your RV siding and roof will last for years.

#### **Maintaining Finish:**

1. Wash your R.V. with liquid detergents.
2. If you prefer to wax the sidewalls, use automotive cleaner or waxes/polishes developed for use on fiberglass boats, showers, and tubs. Follow the directions on the package.

#### **Restoring Gloss:**

This is the procedure for restoring the gloss and finish to a weathered Filon RV product. It is for hand application only.

##### **Materials needed:**

- Mild detergent
- Soft cotton cloth
- Turtle Wax® Rubbing Compound
- Heavy Duty Cleaner
- Turtle Wax® Super Hard Shell Car Wax Paste
- Mechanical buffer (optional)
- Turtle Wax® Polishing Compound (for buffer use only)

1. Wash the Filon panel with a mild detergent and water.
2. Dry the Filon panel with a clean soft cotton cloth.
3. Apply heavy duty cleaner by following the directions on the container.
4. Wash the Filon panel with water and dry the surface.
5. Apply car wax paste per directions.

If a buffer is available, substitute polishing compound in Step 3 for heavy duty cleaner and buff polishing compound lightly. Then continue with Steps 4 and 5.

#### **NOTE:**

Filon panels do not have to be waxed, but should be washed regularly, to be covered under the warranty; however, waxing will maintain the luster and beauty of the sidewall.
