Escape 5.0 Important Facts

Whether you are a seasoned RVer or just starting out, the Escape 5.0 comes prepared. Our commitment to quality and customer satisfaction makes the Escape one of the top rated RVs in North America. The US consumer group has placed the Escape 5.0 at the top of the list based on its coach, frame construction, tow ability and resale value. The Escape 5.0 comes with a full two year warranty and can be seen in many cities across Canada and the United States or stop in and see an Escape as it is being built in beautiful Chilliwack, British Columbia.

Two Piece Fiberglass Shell Construction

The Escape 5.0 represents high quality. The 100% molded fiberglass body is hand-laid in a two piece mold. Our fiberglass team bonds the upper and lower halves together before the shell is demolded and bolted to the frame. Anchor blocks are fiberglassed in strategic points inside the trailer to which interior walls and natural oak cabinetry are securely mounted creating a solid, structurally sound interior/exterior. This solid one-piece fiberglass shell is strong, durable, easy to clean and completely waterproof.

Lightweight & Aerodynamic Design

Many key features of the Escape make it lightweight and aerodynamic. The Escape 5.0 weighs approximately 2620 lbs (dry weight) keeping travel costs to a minimum. The Escape 5.0 targets the mid-size truck market as most trucks, including short-beds, with a V6 engine can tow the Escape.

The aerodynamic design of the Escape 5.0 includes a low center of gravity for better road stability, and decreased wind resistance when in tow. This combined with the rubber torsion suspension axle, which is used in all of our Escape models, not only reduces vibration while traveling but also provides independent suspension and is maintenance free. The 15" Goodyear tires (including the full size spare) are balanced before you pick up your trailer.

Amenities

Don't be fooled by its size. The Escape 5.0 comes standard with an easy and comfortable galley with a large 5.0 cubic foot fridge, a full interior shower, queen upper bunk, independent power landing gear and endless storage. The interior is professionally finished with natural oak cabinetry, large windows, high-grade linoleum flooring and a unique insulated vinyl headliner/wall covering.
